

By your side for convenient care at school.

Telehealth at Your Child's School

When your child gets sick at school it's not always easy to leave work. What can you do? With the use of computers and video, a school nurse can link your child to a doctor or nurse practitioner from Children's HealthSM Pediatric Group (a network of pediatric primary care practices).

Through our telehealth program we will:

- Set an appointment which you may attend if you like
- Review your child's medical history from the school nurse
- Assess your child
- Diagnose what is wrong with your child
- Treat conditions such as fevers, earaches, asthma and allergic rhinitis
- If needed, prescribe a prescription to your pharmacy
- Instruct you about your child's condition with an After-Visit Summary
- Contact your primary care provider and let them know our plan

Get Started Today

Fill out the attached enrollment form and return it to the school nurse or front office.
